2013 MEMBERSHIP APPLICATION

(for full year membership January 1 – December 31)

Complete & fax to (540) 687-8395, or mail it to the address below
Payment must accompany application and be made in US dollars drawn on US bank.

Personal Information

Name: _____
Title: _____
Company Name: _____
Address 1: _____
Address 2: _____
City/State/Zip+4: _____
Country: _____
Is this your Home address or Business address?
Phone: _____ Fax: _____
Email: _____

Membership Options

- Regular Member (IMPACT print/JAWRA online)\$165
 - Receive JAWRA Print\$25
- Online Only Member (IMPACT/JAWRA online)\$135
- Transitional Member (IMPACT print/JAWRA online)\$100
 - Receive JAWRA Print\$25
- International Electronic Member (IMPACT/JAWRA online)\$25
- Student Member (IMPACT print/JAWRA online)\$30
- Associate Member – One office\$500
- Associate Enterprise Member – All offices\$2000
- Membership Certificate (optional)\$11

Payment Options

- Charge my credit card or Check Enclosed
- VISA Mastercard Diner's Club AMEX Discover
- Card #: _____ Exp. _____ CSC#: _____
- Signature: _____

WATER RESOURCES CONSERVATION:

THE TIME IS NOW

PAUL W. LANDER

Guest Associate Editor - paul.dakotaridge@gmail.com

JONATHAN E. JONES

Associate Editor - jonjones@wrightwater.com

Water resources management has always been a challenging endeavor, and the future promises more challenges than ever. The known factors of population growth and scarce resources have been complicated by climate change, which may mean more variability in our world than ever. Add in the fact that all the easy water sources have been tapped, leaving mostly new sources that are much more expensive, and energy-intensive, and it creates a recipe for a very interesting future. In the midst of this great uncertainty, there is one aspect of water resources management, often overlooked, we can make more predictable: demand. By increasing our understanding of demand, we create the opportunity to better manage it. In this issue of *Water Resources IMPACT*, we offer insights from four professionals experienced in various aspects of water conservation and demand management, in hopes of not only providing new information but also motivating water managers to fully embrace demand management as a valuable tool.

FEATURE ARTICLES

3 Demand Side Management's Role in IWRM ...

William Y. Davis

Water conservation, "beneficial reduction of water use or water loss." doesn't necessarily mean imposed restrictions. There are many opportunities for better management through water efficiency and the evaluation necessary to balance management goals. This article presents the possibilities.

6 How Modeling and Water Conservation Can Help Improve How Your System Performs in a Drought ...
William B. DeOreo

A drought is not the time to begin thinking about conserving water. Investing in efficiency on a regular basis brings more resiliency to a water system, allowing for a fuller response to drought and shortages. This article shows how modeling your system can help you find answers before problems arise.

11 Water Budgets: A Framework for Conservation ...
Paul W. Lander

Water managers must inevitably deal with volatility to demand, but predictably of demand offers benefits to water resources managers, communities, and water consumers. This article shows how water budgets can increase the predictability of demand.

13 Landscape Water Conservation and Water Quality Practices Go Hand-in-Hand ...
Jane Clary

Water use efficiency is not the only water-related issue facing landscape managers. In this article the author shows how these issues interact and complement one another.
